Professional Summary

I am an accomplished individual in Business Management with over 10 years of experience in operational leadership and technical proficiency. My track record of success in improving businesses is a result of my leadership, business management and technical competence. I have further developed my expertise by Simultaneously, pursuing Full Stack Engineer Certification at Coding Dojo, specializing in full-stack application development and data analysis to enhance my skill set.

Projects:

SasquatchWebSighting;

- A user-friendly full-stack application where users SignUp/ LogOn and can post instances of their Sasquatch encounters.
- MVC(Model, View, Controller) structure.
- Secured 100% of user data by using frontend/backend validations and utilizing the Bcrypt functionality to hash the user's password before submission.

CouponClipper;

- It allows users to add their business details and coupons to the app and allows other users to view and use the coupons.
- For the user interface, it utilizes HTML, CSS, and Bootstrap which are used for structuring and styling the pages respectively.
- It uses .Net CORE, utilizing LINQ, a set of features in .NET that extends powerful query capabilities and Asp.net.

Work Experience:

General Manager; Wingstop

Jan '23-Present

- Manage full operational processes and increased quarterly sales by 23% resulting in \$514K annual revenue.
- Recruiting, training, and managing team members with the District Manager.
- Managing team performance, including coaching and discipline.
- Streamlining inventory management for precision and record-keeping excellence.

Full Stack Engineer; Atlantida International

Dec '22 – Jan '23

- Working with a software dev. team to define the scope/scale of software projects.
- Collaborated to design, develop and deliver code that is scalable and secure.
- Completed data structures to manipulate, organize and store data efficiently.
- Created design patterns e.g. MVC(Model, View, Controller).

- HTML, CSS, JavaScript, .Net CORE,LINQ with Asp.net.

Full Stack Engineer Student; Coding Dojo

Aug '22 – Current

- Developed 3 comprehensive full-stack applications that can perform CRUD operations within a timeframe of 5 hours utilizing Python, MERN, C#.
- Assured that 100% of user input was validated before submission to the database.
- Utilized API calls to analyze Json data and render information onto web applications.
